

Scheme

-
- The diagram illustrates a Broker-Server architecture. On the left, a vertical stack of three components is shown: a grey box at the top labeled "Market Data Gateway", a blue box in the middle labeled "UTP", and a grey box at the bottom labeled "Order Gateway". On the right, there is a grey box labeled "Broker" which contains a smaller blue box labeled "TRADE APP workstation". Below the "Broker" box is a blue box labeled "TRADE APP Server". A dashed line labeled "WAN/Internet (VPN)" connects the "Broker" box to the "TRADE APP Server" box. Data flow is indicated by arrows: a double-headed arrow connects "Order Gateway" and "TRADE APP Server" with labels "Order confirmation / Transaction" (above) and "Order/ Modification/ Cancel" (below); a single arrow points from "Order Gateway" to "Market Data Gateway"; a single arrow points from "Market Data Gateway" to "TRADE APP Server"; a single arrow points from "TRADE APP workstation" to "TRADE APP Server" labeled "Order/ Modification/ Cancel"; a single arrow points from "TRADE APP Server" to "Broker" labeled "Order Confirmation"; and a single arrow points from "Broker" to "TRADE APP Server" labeled "Transaction".

How to order?
