

webTRADE APP

Summary

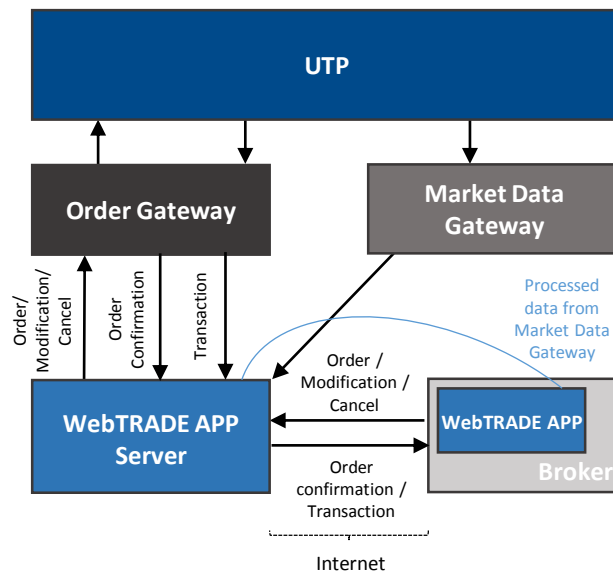

Access terms

- A solution developed by Asseco Poland, available only to WSE Members under a sub-licence.
- WebTRADE APP uses the Web, an internet browser and secure SSL protocol.
- WebTRADE APP servers are installed at both WSE data centres, switching between the servers (primary and back-up) is not visible to the Authorised Users.
- The WSE Member is responsible for designing and maintaining WebTRADE APP Service access architecture.
- WSE retains the rights to sub-licencing the WebTRADE APP software and granting rights to access UTP.
- WSE Client site should be equipped with the following:
 - Internet access infrastructure;
 - A workstation with Internet access to WebTRADE APP.

Service description

- Market participants have access to exchange services and process orders via the internet solution WebTRADE APP .
- An alternative for WSE Members interested in back-up solutions or access to the WSE without having to pay extra cost of infrastructure maintenance.
- The solution supports core functionalities necessary to process orders without having to develop advanced infrastructure, in particular:
 - Allows order placement without the functionality of closing or reporting block trades;
 - Supports only core order management tools including search, filters, etc..
- The WebTRADE APP solution does not support API communication with other IT systems.
- We do not recommend access to the WSE WebTRADE APP access service for professional market participants such as market makers.

Scheme

How to order?

Sign the agreement concerning access of the Exchange Member to Exchange IT systems and/or complete attachments to the agreement:

- Attachments 3 and 4 to the agreement concerning access of the Exchange Member to Exchange IT systems.
- No. 4 attachment to the agreement concerning access of the Exchange Member to Exchange IT systems (Technical Data Sheet).
