I. SUMMARY

The information set out below is a summary only and should be read in conjunction with the rest of this document. This summary is intended to convey the essential characteristics and risks associated with the Issuer, and in relation to the Securities and does not purport to be complete. It is taken from, and is qualified in its entirety by, the remainder of this document, including the Conditions, which constitute the legally binding conditions of the Securities as attached to the global security. Accordingly, this summary should be read as an introduction to the document, and any decision to invest in the Securities should be based on consideration of the document as a whole by the investor.

Prospective investors should be aware that where a claim relating to the information contained in this document is brought before a court, the investor making the claim might, under the national legislation of the respective EU member state, have to bear the costs of translating the prospectus before the legal proceedings are initiated.

Civil liability attaches to the Issuer who has tabled the summary including the translation thereof and applied for its notification, but only if the summary is misleading, inaccurate or inconsistent when read together with the other parts of the document.

A. SUMMARY OF RISK FACTORS

1. Risks relating to the Securities

An investment in the Securities involves risks. These risks may include, among others, equity market, bond market, foreign exchange, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Prospective purchasers should be experienced with respect to transactions in instruments such as the Securities and in the underlying asset or other basis of reference for the Securities (the “**Underlying**”). Prospective purchasers should understand the risks associated with an investment in the Securities and should only reach an investment decision after careful consideration, with their legal, tax, accounting and other advisers, of (a) the suitability of an investment in the Securities in the light of their own particular financial, tax and other circumstances, (b) the information set out in this document and (c) the Underlying.

The Securities may decline in value and investors should be prepared to sustain a total loss of their investment in the Securities.

An investment in the Securities should only be made after assessing the direction, timing and magnitude of potential future changes in the value of the Underlying, and/or in the composition or method of calculation of the Underlying, as the return of any such investment will be dependent, *inter alia*, upon such changes. More than one risk factor may have simultaneous effect with regard to the Securities such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Securities.

2. Issuer Risk Factors

Prospective investors should consider all information provided in the Registration Document and consult with their own professional advisers if they consider it necessary. The following describes risk factors relating to the issuer’s ability to meet its obligations under the securities.

3. Ratings

Ratings assigned to the Issuer by certain independent rating agencies are an indicator of the Issuer’s ability to meet its obligations in a timely manner¹. The lower the assigned rating is on the respective scale the higher the respective rating agency

assesses the risk that obligations will not be met at all or not be met in a timely manner. As of the publication date of this summary, the following ratings were assigned to Deutsche Bank:

Rating Agency	Long-term	Short-term
Standard & Poor's (S&P)	AA	A-1+
Moody's	Aa1	P-1
Fitch	AA-	F1+

Rating agencies may change their ratings at short notice. A rating's change may affect the price of securities outstanding.

2. Further Information on the Terms of the Securities

a) The Securities represent an investment similar to a direct investment in the Underlying. In contrast to a direct investment, the Securities offer investors a chance to receive, following certain predefined Dates (the Barrier Determination Dates) prior to maturity of the Securities, a cash amount fixed for each such date, if the value of the Underlying on a Barrier Determination Date is equal to or greater than the defined Determination Level. In such case, the Cash Settlement Amount will reflect the value of the Underlying at or around issuance of the Securities plus a certain premium, which will be the higher the later such early redemption occurs. As the Securities will

1 The Issuer pays placement and trailer fees as sales-related commissions to the relevant distributor. The distributors act independently and not as agent for the Issuer. Placement fees are one-off payments from the proceeds of the issue; alternatively, the Issuer can grant the relevant distributor an appropriate discount on the issue price (without subscription surcharge). Payment of trailer fees are recurring and conditional upon the volume of securities issued. If Deutsche Bank AG is both the issuer and the distributor with respect to the sale of the Securities, Deutsche Bank's distributing division will be credited with the relevant amounts internally. – Further information on prices and price components are included in the section "Conflicts of interest" under nos. 5 and 6.

2 The amounts mentioned above are as of the date of the preparation of this document and subject to potential changes during the offering period and/or the term of the Securities; further information may be obtained from the distributor.

be sold at an issue price reflecting the level of the Underlying at or around issuance, this will allow investors to receive a return for their investment reflecting such premium. - For that option, investors forego the opportunity to participate in any further growth in the value of the Underlying beyond the Determination Level after an early redemption of the Securities as described above has occurred.

Otherwise, investors in the Securities will receive a cash amount at maturity of the Securities, which will correspond to what they would receive if they would, at the same time, liquidate a direct investment in the Underlying entered into at the time of issuance of the Securities, unless the value of the Underlying has not during the defined Barrier Determination Period been lower than the defined Barrier Level, in which case the Cash Settlement Amount will equal the value of the Underlying at or around issuance of the Securities; accordingly, the Securities provide a degree of protection against a decrease in the value of the Underlying.

A further difference from a direct investment in the Underlying is that investors will forego the right to receive any dividends, interest or similar amounts paid in respect of the Underlying.

b) The Securities represent the right to receive payment of the Cash Settlement Amount at settlement. The Cash Settlement Amount will depend on whether on a Barrier Determination Date, the Barrier Determination Amount has been equal to or above the Determination Level (such event a "**Knock-Out Event**"). If a Knock-Out Event occurs, the Cash Settlement Amount will be the amount specified above in relation to such Barrier Determination Date and the Securities will be redeemed early on the relevant Settlement Date. If a Knock-Out Event does not occur, if during the Barrier Determination Period, the Barrier Determination Amount, as the value of the Underlying at the relevant time, has not been lower than the Barrier Level, then the Cash Settlement Amount will reflect the value of the Underlying at or about the date of issuance of the Securities, otherwise the Cash Settlement Amount will reflect the value of the Underlying on the Valuation Date divided by the value of the Underlying at or about the date of issuance of the Securities.

The value of the Underlying on any day will reflect the value of its constituents on such day. Changes in the composition of the Underlying and factors (including those described above) which either affect or may affect the value of the constituents, will affect the value of the Underlying and therefore may affect the return on an investment in the Securities.

In addition, each value of the Underlying relevant for the determination of the Cash Settlement Amount is deemed to be in the Settlement Currency, without reference to any exchange rate between the Reference Currency and the Settlement Currency (so-called "**quanto securities**"). As a result, an investment in the Securities will not involve exchange rate risks. However, the relative interest rate difference between the current interest rate relating to the Reference Currency and the current interest rate relating to the Settlement Currency may influence the price of the Securities.

In addition, investors will be exposed to exchange rate risk where the Settlement Currency is different from the currency of the investor's home jurisdiction or the currency in which an investor wishes to receive funds.

II. RISK FACTORS

A. ISSUER RISK FACTORS

An investment in debt securities, including certificates, and money market papers issued by Deutsche Bank bears the risk that Deutsche Bank is not able to fulfil its obligations created by the issuance of the securities on the relevant due date.

In order to assess the risk, prospective investors should consider all information provided in this Registration Document and consult with their own professional advisers if they consider it necessary.

The risk related to an Issuer's ability to fulfil its obligations created by the issuance of debt securities and money market papers is described by reference to the credit ratings assigned by independent rating agencies. A credit rating is an assessment of the solvency or credit-worthiness of creditors and/or bond-issuers according to established credit review procedures. These ratings and associated research help investors analyse the credit risks associated with fixed-income securities by providing detailed information of the ability of issuers to meet their obligations. The lower the assigned rating is on the respective scale, the higher the respective rating agency assesses the risk that obligations will not, not fully and/or not timely be met. A rating is not a recommendation to buy, sell or hold any notes issued and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency. A suspension, reduction or withdrawal of any rating assigned may adversely affect the market price of the notes issued.

Deutsche Bank is rated by Standard & Poor's Ratings Services, a division of The McGraw-Hill Companies, Inc. ("**S&P**"), Moody's Investors Service, Inc. ("**Moody's**") and by Fitch Ratings Limited ("**Fitch**", together with S&P and Moody's, the "**Rating Agencies**").

As of the Publication Date of this Registration Document, the ratings assigned by the Rating Agencies to debt securities and money market papers of Deutsche Bank were as follows:

by S&P:	long-term rating:	AA
	short-term rating:	A-1+
	outlook:	negative

S&P defines:

AA: An obligation rated "AA" differs from the highest rated obligations only in small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

Long-term ratings by S&P are divided into several categories ranging from "AAA", reflecting the strongest creditworthiness, over categories "AA", "A", "BBB", "BB", "B" "CCC", "CC", "C" to category "D", reflecting that an obligation is in payment default. The ratings from "AA" to "CCC" may be modified by the addition of a plus "+" or minus "-" sign to show relative standing within the major rating categories.

A-1+: A short-term obligation rated "A-1" is rated in the highest category by S&P. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign "+". This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

Short-term ratings by S&P are divided into several categories ranging from "A-1", reflecting the strongest creditworthiness, over categories "A-2", "A-3", "B", "C" to category "D" reflecting that an obligation is in payment default.

by Moody's: long-term rating: Aa1
 short-term rating: P-1
 outlook: stable

Moody's defines:

Aa1: Obligations rated "Aa" are judged to be of high quality and are subject to very low credit risk.

Moody's long-term obligation ratings are divided into several categories ranging from "Aaa", reflecting the highest quality with minimal credit risk, over categories "Aa", "A", "Baa", "Ba", "B", "Caa", "Ca" to category "C", reflecting the lowest rated class of bonds which are typically in default with little prospect for recovery of principal or interest. Moody's appends numerical modifiers 1, 2 and 3 to each generic rating classification from "Aa" through "Caa". The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

P-1: Issuers rated Prime-1 have a superior ability to repay short-term debt obligations.

Moody's short-term ratings are divided into several categories ranging from "P-1", reflecting a superior ability of an Issuer to repay short-term debt obligations, over categories "P-2" and "P-3" to category "NP", reflecting that an Issuer does not fall within any of the Prime rating categories.

by Fitch: long-term rating: AA-
 short-term rating: F1+
 outlook: stable

Fitch defines:

AA-: A rating of "AA" denotes a very low expectation of credit risk. It indicates a very strong capacity for timely payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

Fitch's long-term ratings are divided into several major categories ranging from "AAA", reflecting the highest credit quality, over categories "AA", "A", "BBB", "BB", "B", "CCC, CC, C" to category "DDD, DD, D", reflecting that an obligor has defaulted on some or all of its obligations. A plus ("+") or minus ("-") sign may be appended to a rating to denote the relative status within major rating categories. Such suffixes are not added to the "AAA" category or to categories below "CCC".

F1+: A rating of "F1" indicates the strongest capacity for timely payment of financial commitments. It may have an added plus ("+") sign to denote any exceptionally strong credit feature.

Fitch's short-term ratings are divided into several categories ranging from "F1", reflecting the highest credit quality, over categories "F2", "F3", "B", "C" to category "D" which denotes an actual or imminent payment default.

Rating of Subordinated Obligations

If Deutsche Bank enters into subordinated obligations, these obligations may be rated lower because, in the case of an insolvency or liquidation of the Bank, the claims and interest claims resulting from these obligations are subordinate to those claims of creditors of the Bank that are not also subordinated. Deutsche Bank will disclose the ratings of subordinated obligations (if any).

B. PRODUCT SPECIFIC RISK FACTORS

1. Introduction

The discussion below is intended to describe various risk factors associated with an investment in the Securities. No investment should be made in the Securities until after careful consideration of all those factors which are relevant in relation to the Securities. The Issuer believes that the factors described below represent the principal risks inherent in investing in the Securities, but does not represent that the statements below regarding risks of holding the Securities are exhaustive. Prospective investors should also read the detailed information set out elsewhere in this document and reach their own views prior to making any investment decision.

Prospective investors should also consider carefully the description of the Underlying (as defined below) in the sections "Product Conditions" and "Information relating to the Underlying" and the further information which is available in relation to the Underlying.

This document is not, and does not purport to be, investment advice.

An investment in the Securities involves risks. These risks may include, among others, equity market, bond market, foreign exchange, interest rate, market volatility and economic, political and regulatory risks and any combination of these and other risks. Some of these are briefly discussed below. Prospective purchasers should be experienced with respect to transactions in instruments such as the Securities and in the Underlying. Prospective purchasers should understand the risks associated with an investment in the Securities and should only reach an investment decision after careful consideration, with their legal, tax, accounting and other advisers, of (a) the suitability of an investment in the Securities in the light of their own particular financial, tax and other circumstances, (b) the information set out in this document and (c) the Underlying.

The Securities may decline in value.

An investment in the Securities should only be made after assessing the direction, timing and magnitude of potential future changes in the value of the Underlying, and/or in the composition or method of calculation of the Underlying, as the return of any such investment will be dependent, *inter alia*, upon such changes. More than one risk factor may have simultaneous effect with regard to the Securities such that the effect of a particular risk factor may not be predictable. In addition, more than one risk factor may have a compounding effect which may not be predictable. No assurance can be given as to the effect that any combination of risk factors may have on the value of the Securities.

Additional Risk Factors are set out under the headings "C. General Risk Factors relating to the Securities" and "D. Market Factors". In addition prospective investors should also review section "E. Conflicts of Interest".

2. Rights under the Securities

Prospective investors should note that the return (if any) on their investment in the Securities will depend on the performance of the Underlying and whether a Knock-Out Event occurs.

In the absence of a Knock-Out Event, investors that buy the Securities at the Issue Date and hold the Securities for the entire term will receive the Cash Settlement Amount which will reflect the value of the Underlying at or around settlement, and will thus not achieve a return on the initial investment, but will avoid a loss, unless the value of the Underlying has been lower than the Barrier Level. In the latter case, investors will receive the Cash Settlement

Amount reflecting the value of the Underlying on the Valuation Date divided by the value of the Underlying at or about the date of issuance of the Securities. In such a case, if the value of the Underlying on the Valuation Date is below the value of the Underlying at or about the Issue Date, investors that have bought the Securities at the Issue Date and hold them for their entire term will make a loss on their investment and may lose their investment entirely if such value on the Valuation Date is zero.

Accordingly, an investment in the Securities involves a number of risks which may include, without limitation, a similar market risk to a direct investment in the Underlying and investors should take advice accordingly.

C. GENERAL RISK FACTORS RELATING TO THE SECURITIES

1. No Payments until Settlement

Prospective investors should note that no periodic interest payments or other distributions will be made during the term of the Security. A realisation in the secondary market of the Securities may be the only return potentially available to the investor prior to settlement of the Securities. However, investors should note the risk factors described under the headings "Market value" and "The Securities may be Illiquid" below in this regard.

2. Early Termination for Extraordinary Reasons, Illegality and Force Majeure

If the Issuer determines that, for reasons beyond its control, the performance of its obligations under the Securities has become illegal or impractical in whole or in part for any reason, or the Issuer determines that, for reasons beyond its control, it is no longer legal or practical for it to maintain its hedging arrangements with respect to the Securities for any reason, the Issuer may at its discretion and without obligation terminate early the Securities. If the Issuer terminates early the Securities, the Issuer will, if and to the extent permitted by applicable law, pay the holder of each such Security an amount determined by the Calculation Agent to be its fair market value notwithstanding the illegality or impracticality less the cost to the Issuer of unwinding any underlying related hedging arrangements.

3. Market Disruption Events, Adjustments and Early Termination of the Securities

If so indicated in the Conditions, the Calculation agent may determine that a market disruption event has occurred or exists at a relevant time. Any such determination may delay valuation in respect of the Underlying which may have an effect on the value of the Securities and/or may delay settlement in respect of the Securities.

In addition, if so indicated in the Conditions, the Calculation Agent may make adjustments to the Conditions to account for relevant adjustments or events in relation to the Underlying including, but not limited to, determining a successor to the Underlying or its issuer or its sponsor, as the case may be. In addition, in certain circumstances, the Issuer may terminate early the Securities following any such event. In this case, in relation to each Security, the Issuer will pay an amount, if any, determined as provided in the Conditions.

Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities and what constitutes a event or relevant adjustment event.

4. Taxation

Potential purchasers and sellers of the Securities should be aware that they may be required to pay stamp taxes or other documentary charges in accordance with the laws and practices of the country where the Securities are transferred. Securityholders are subject to the provisions of General Condition 6 and payment and/or delivery of any amount due in respect of the Securities will be conditional upon the payment of certain taxes, duties and/or expenses as provided in the Product Conditions.

Potential purchasers who are in any doubt as to their tax position should consult their own independent tax advisers. In addition, potential purchasers should be aware that tax regulations and their application by the relevant taxation authorities change from time to time. Accordingly, it is not possible to predict the precise tax treatment which will apply at any given time.

5. Exercise Notice and Certifications

If the Securities are subject to provisions concerning delivery of an exercise notice and such notice is received by either the relevant principal agent with a copy to the clearing agent after the latest time specified in the Conditions, it will not be deemed to be duly delivered until the next following business day. Such deemed delay may in the case of cash settled Securities increase or decrease the cash amount payable at settlement from what it would have been but for such deemed delivery. In the case of Securities which are exercisable on one day only or only during an exercise period, any exercise notice, if not delivered by the latest time specified in the Conditions, shall be void.

The failure to deliver any certifications required by the Conditions could result in the loss or inability to receive amounts or deliveries otherwise due under the Securities. Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities.

Securities not exercised in accordance with the Conditions will expire worthless. Prospective purchasers should review the Conditions to ascertain whether the Securities are subject to automatic exercise, and when and how an exercise notice may be validly delivered.

6. Time Lag after Exercise

Where the Securities are to be settled by a cash payment, then, upon their exercise, there may be a time lag between the time exercise occurs and the time the applicable cash amount relating to such exercise is determined. Any such delay between the time of exercise and the determination of the cash amount will be specified in the Conditions. However, such delay could be significantly longer, particularly in the case of a delay in exercise of such cash settled Securities arising from, as described below, any daily maximum exercise limitation or, as described below, upon the determination by the calculation agent that an event has occurred at any relevant time. The applicable cash amount could decrease or increase from what it would have been but for such delay.

Prospective purchasers should review the Conditions to ascertain whether and how such provisions apply to the Securities.

7. Re-offer Price

The Issuer may enter into distribution agreements with various financial institutions and other intermediaries as determined by the Issuer (collectively the "**Selling Agents**"). The Selling Agents will agree, subject to the satisfaction of certain conditions, to subscribe for the Securities at a price equivalent to or below the Issue Price. The Selling Agents have agreed to bear certain costs in connection with the issue of the Securities. A periodic fee may be payable to the Selling Agents in respect of all outstanding Securities up to and including the Expiry Date at a rate as determined by the Issuer. Such rate may vary from time to time. The Selling Agents will agree to comply with the selling restrictions set out in the document as amended and supplemented by the additional selling restrictions set out in the relevant distribution agreements and final terms of the prospectus.

The Issuer has the right to close the offering of the Securities prior to the end of the subscription period in case of adverse market conditions, as determined by the Issuer in its reasonable discretion, including but not limited to increased equity market volatility and increased currency exchange rate volatility.

D. MARKET FACTORS

1. Market Factors

1.1 Valuation of the Underlying

An investment in the Securities involves risk regarding the value of the Underlying or of any basket constituents comprising the Underlying. The value of the Underlying or of any basket constituents may vary over time and may increase or decrease by reference to a variety of factors which may include corporate actions, macroeconomic factors and speculation.

1.2 The Historical Performance of the Underlying or of any Basket Constituents is not an Indication of Future Performance

The historical value (if any) of the Underlying or of any basket constituents does not indicate the future performance of the Underlying or of any basket constituents. Changes in the value of the Underlying or of any basket constituents will affect the trading price of the Securities, but it is impossible to predict whether the value of the Underlying or of any basket constituents will rise or fall.

1.3 The Basis of Calculating the Level of the Underlying or of any Basket Constituents may Change over Time

The basis of calculating the level of the Underlying or of any basket constituents may from time to time be subject to change (as described in "Information relating to the Underlying") which may affect the market value of the Securities at any time and therefore the cash amount payable on settlement.

1.4 The Value of the Constituents of the Underlying will Affect its Value

The value of the Underlying on any day will reflect the value of the constituents on such day. Changes in the composition of the Underlying and factors (including those described in these Risk Factors) which either affect or may affect the value of the basket constituents will affect the value of the Securities. The historical value (if any) of the constituents does not indicate their future performance. Where the value of the constituents is determined in a different currency to the settlement currency of the Securities, investors may be exposed to exchange rate risk.

1.5 Exchange Rate Risk

Prospective investors should be aware that an investment in the Securities may involve exchange rate risks. For example, the settlement currency of the Securities may be different from the currency of an investor's home jurisdiction or the currency in which an investor wishes to receive funds.

Exchange rates between currencies are determined by factors of supply and demand in the international currency markets which are influenced by macroeconomic factors, speculation and central bank and government intervention or other political factors (including the imposition of currency controls and restrictions). Fluctuations in exchange rates may affect the value of the Securities and any amounts payable in respect of the Securities.

1.6 Interest Rate Risk

An investment in the Securities may involve interest rate risk where there are fluctuations in the interest rates payable on deposits in the settlement currency of the Securities. This may influence the market value of the Securities.

Interest rates are determined by factors of supply and demand in the international money markets which are influenced by macroeconomic factors, speculation and central bank and government intervention or other political factors. Fluctuations in

short term and/or long term interest rates may affect the value of the Securities. If the Underlying includes a fixed income security, the value of the Securities is expected to be particularly affected by interest rate fluctuations.

2. Market Value

The market value of the Securities during their term depends primarily on the value and the volatility of the Underlying or of any basket constituents and the level of interest rates for instruments of comparable maturities.

The level of market volatility is not purely a measurement of the actual volatility, but is largely determined by the prices for instruments which offer investors protection against such market volatility. The prices of these instruments are determined by forces of supply and demand in the options and derivative markets generally. These forces are, themselves, affected by factors such as actual market volatility, expected volatility, macroeconomic factors and speculation.

Interest rate changes generally have the same impact on the value of the Securities as for fixed rate bonds: Rising interest rates will under normal conditions result in a lower value of the Securities, falling interest rates in a higher value of the Securities.

The value of the Underlying on any day will reflect the value of its constituents on such day. Changes in the composition of the Underlying and factors (including those described above) which either affect or may affect the value of the constituents, will affect the value of the Underlying and therefore may affect the return on an investment in the Securities.

3. Certain Hedging Considerations

Certain risks apply to purchasers that acquire the Securities for hedging purposes.

Prospective purchasers intending to purchase the Securities for the purpose of hedging their exposure to the Underlying or any basket constituents should recognise the risks of utilising the Securities in such manner. No assurance is or can be given that the value of the Securities will correlate with movements in the value of the Underlying or any basket constituents and the composition of the Underlying or any basket constituents may change over time. Furthermore, it may not be possible to liquidate the Securities at a price which directly reflects the value of the Underlying or any basket constituents. Therefore, there can be no assurance as to the level of any correlation between the return on an investment in the Securities and the return on a direct investment in the Underlying or any basket constituents.

Hedging transactions in order to limit the risks associated with the Securities might not be successful.

4. The Securities may be Illiquid

It is not possible to predict if and to what extent a secondary market may develop in the Securities or at what price the Securities will trade in the secondary market or whether such market will be liquid or illiquid. If so specified in this document, application has been made to list or quote or admit to trading the Securities on the stock exchange(s) or quotation system(s) specified. If the Securities are so listed or quoted or admitted to trading, no assurance is given that any such listing or quotation or admission to trading will be maintained. The fact that the Securities may be so listed or quoted or admitted to trading does not necessarily lead to greater liquidity than if they were not so listed or quoted or admitted to trading.

If the Securities are not listed or quoted or admitted to trading on any stock exchange or quotation system, pricing information for the Securities may be more difficult to obtain and the liquidity of the Securities may be adversely affected. The liquidity of the Securities may also be affected by restrictions on offers and sales

of the Securities in some jurisdictions.

The Issuer may, but is not obliged to, at any time purchase Securities at any price in the open market or by tender or private agreement. Any Securities so purchased may be held or resold or surrendered for cancellation. Since the Issuer may be the only market-maker in the Securities, the secondary market may be limited. The more limited the secondary market is, the more difficult it may be for holders of the Securities to realise value for the Securities prior to settlement of the Securities.

5. Creditworthiness of the Issuer

The value of the Securities is expected to be affected, in part, by investors' general appraisal of the Issuer's creditworthiness. Any reduction in the creditworthiness of the Issuer could result in a reduction in the value of the Securities. If a bankruptcy proceeding is commenced in respect to the Issuer, the return to a Securityholder may be limited and any recovery will likely be substantially delayed.

E. CONFLICTS OF INTEREST

1. Transactions Involving the Underlying

The Issuer and its affiliates may from time to time engage in transactions involving the Underlying for their proprietary accounts and for accounts under their management. Such transactions may have a positive or negative effect on the value of the Underlying and consequently upon the value of the Securities. As used in this section "Conflicts of Interest", references to the Underlying shall be deemed to include any of its constituents, if applicable.

2. Acting in other Capacities

The Issuer and its affiliates may from time to time act in other capacities with regard to the Securities, such as calculation agent, agent and/or index sponsor. Such functions can allow the Issuer to determine the composition of the Underlying or to calculate its value, which could raise conflicts of interest where securities or other assets issued by the Issuer itself or a group company can be chosen to be part of the Underlying, or where the Issuer maintains a business relationship with the issuer of such securities or assets.

3. Issuing of other Derivative Instruments in respect of the Underlying

The Issuer and its affiliates may issue other derivative instruments in respect of the Underlying and the introduction of such competing products into the marketplace may affect the value of the Securities.

4. Conducting of Hedging Transactions

The Issuer may use all or some of the proceeds received from the sale of the Securities to enter into hedging transactions. The Issuer believes that such hedging activity will under normal circumstances not have a material impact on the value of the Securities. However, it cannot be assured that the Issuer's hedging activities will not affect such value. The value of the Securities might in particular be affected by the liquidation of all or a portion of the hedging positions (a) at or about the time of the maturity or expiration of the Securities or (b), if the Securities provide for a knock-out, knock-in or a similar feature, at the time when the price or value of the Underlying approaches the relevant price or level for the knock-out, knock-in or other feature.

5. Issue Price

The issue price charged for the Securities can, in addition to loading charges, management or other fees charged, comprise a premium on the original mathematical ("fair") value of the Securities which is not visible to investors. Such premium is determined by the Issuer in its discretion and can differ from premiums charged by other issuers for comparable securities.

6. Market-Making for the Securities

The Issuer, or an agent on its behalf, may act as market-maker for the Securities. In such market-making, the Issuer or its agent will, to a large extent, determine the price of the Securities itself. The prices quoted by such market-maker will usually not correspond to the prices which would have formed without such market-making and in a liquid market.

Circumstances taken into account by the market-maker when setting the quoted bid-offer prices in the secondary market notably include the Securities' fair value, which, among other things, depends on the value of the Underlying, as well as a certain bid-offer spread targeted by the market-maker. The market-maker will in addition regularly take into account a loading charge originally raised for the Securities and

any fees or costs which at maturity of the Securities are to be subtracted from the cash amount (including management, transaction or other fees charged on the basis of the Product Conditions). Furthermore, the prices quoted in the secondary market will be influenced, for example, by a premium on the Securities' original value contained in their issue price (see under 5. above), and by dividends paid or received by the Underlying, or its constituents, or other proceeds which, due to the Securities' design, are economically attributable to the Issuer.

The bid-offer spread for the Securities will be set by the market-maker based on supply and demand for the Securities and certain revenue considerations.

Certain costs, like for example management fees charged on the basis of the Product Conditions, are in many cases not taken out of the quoted prices on a consistent basis over the term of the Securities (pro rata temporis), but are subtracted from the Securities' fair value completely at an earlier point in time, as determined by the market-maker in its discretion. The same applies for a premium contained in the issue price and for dividends and other proceeds of the Underlying which, due to the Securities' design, are economically attributable to the Issuer, which often are not subtracted when the Underlying, or its constituents, are traded "ex dividend", but at an early stage of the Securities' term based on expected dividends for the entire term or a certain time span. The rate at which such costs are subtracted depends, *inter alia*, on the net flow back of Securities to the market-maker.

Subsequently, the prices quoted by the market-maker can substantially differ from the fair value of the Securities, or the value to be expected economically on the basis of the factors mentioned above, at the relevant time. In addition, the market-maker can at any time alter the methodology used to set the quoted prices, e. g. increase or decrease the bid-offer spread.

7. Market-Making for the Underlying

The Issuer may, in certain cases, act as a market-maker for the Underlying, which might in particular be the case when the Issuer has also issued the Underlying. By such market-making, the Issuer will, to a large extent, determine the price of the Underlying, and consequently influence the value of the Securities itself. The prices quoted by the Issuer in its market-making function will not always correspond to the prices which would have prevailed without such market-making and in a liquid market.

8. Acting as Underwriter or otherwise for the issuer of Underlying

The Issuer and its affiliates may also act as underwriter in connection with future offerings of the Underlying or may act as financial adviser to the issuer of an Underlying or in a commercial banking capacity for the issuer of an Underlying. Such activities could present certain conflicts of interest and may affect the value of the Securities.

9. Obtaining of Non-public Information

The Issuer and/or its affiliates may acquire non-public information with respect to the Underlying, and neither the Issuer nor any of its affiliates undertakes to disclose any such information to any Securityholder. In addition, one or more of the Issuer's affiliates may publish research reports with respect to the Underlying. Such activities could present conflicts of interest and may affect the value of the Securities.

V. GENERAL INFORMATION

A. GENERAL TAXATION INFORMATION

1. Introduction

Purchasers and/or sellers of Securities may be required to pay stamp taxes and other charges in accordance with the laws and practices of the country of transfer in addition to the issue price or purchase price of the Securities.

Transactions involving the Securities (including purchases, transfers, exercise or non-exercise or redemption, the accrual or receipt of any interest payable on the Securities and the death of a holder of any Securities may have tax consequences for holders and potential purchasers which may depend, amongst other things, upon the tax status of the holder or potential purchaser and may relate to - amongst other taxes and duties - stamp duty, stamp duty reserve tax, income tax, corporation tax, trade tax, capital gains tax, withholding tax, solidarity surcharge and inheritance tax.

For more specific information on the tax consequences please see the appropriate Country Specific Information.

General Condition 6 (Taxation) in the General Conditions should also be considered carefully by all potential purchasers of any Securities.

Potential purchasers of Securities are advised to consult their own tax advisors as to the tax consequences of transactions involving the Securities.

2. Taxation in Luxembourg

The following summary is based on the laws presently in force in Luxembourg, though it is not intended to be, nor should it be construed to be, legal or tax advice. Prospective investors in the Securities should therefore consult their own professional advisers as to the effects of state, local or foreign laws, including Luxembourg tax law, to which they may be subject.

2.1 Non-resident Holders of Securities

Under Luxembourg general tax laws in force at the date of this Base Prospectus, there is no withholding tax on payments of principal, premium or interest made to non-residents holders of Securities, nor on accrued but unpaid interest in respect of the Securities, nor is any Luxembourg withholding tax payable upon redemption or repurchase of the Securities held by non-resident holders of Securities.

However, under the Luxembourg laws of 21 June 2005 (the "**Laws**"), implementing the Council Directive 2003/48/EC of 3 June 2003 on taxation of savings income in the form of interest payments and ratifying the treaties entered into by Luxembourg and certain dependent and associated territories of EU Member States (the "**Territories**"), payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to or for the immediate benefit of an individual beneficial owner or a residual entity, as defined by the Laws, which are resident of, or established in, an EU Member State (other than Luxembourg) or one of the Territories will be subject to a withholding tax unless the relevant recipient has adequately instructed the relevant paying agent to provide details of the relevant payments of interest or similar income to the fiscal authorities of his/her/its country of residence or establishment, or, in the case of an individual beneficial owner, has provided a tax certificate issued by the fiscal authorities of his/her country of residence in the required format to the relevant paying agent. Where withholding tax is applied, it will be levied at a rate of 15% during the first three-year period starting 1 July 2005, at a rate of 20% for the subsequent three-year period and at a rate of 35% thereafter. Responsibility for the withholding of the tax will be assumed by the

Luxembourg paying agent. Payments of interest under the Securities coming within the scope of the Laws would at present be subject to withholding tax of 15%.

2.2 Resident Holders of Securities

Under Luxembourg general tax laws currently in force, there is no withholding tax on payments of principal, premium or interest made to Luxembourg resident holders of Securities, nor on accrued but unpaid interest in respect of Securities, nor is any Luxembourg withholding tax payable upon redemption or repurchase of Securities held by Luxembourg resident holders of Securities.

However, under the Luxembourg law of 23 December 2005 (the "**Law**") payments of interest or similar income made or ascribed by a paying agent established in Luxembourg to or for the immediate benefit of an individual beneficial owner who is resident of Luxembourg will be subject to a withholding tax of 10%. Such withholding tax will be in full discharge of income tax if the beneficial owner is an individual acting in the course of the management of his/her private wealth. Responsibility for the withholding of the tax will be assumed by the Luxembourg paying agent. Payments of interest under the Securities coming within the scope of the Law would be subject to withholding tax of 10%.

3. Stamp Duty and Withholding Tax in Germany

The following paragraphs, which are intended as a general guide on stamp duty and withholding tax only, are based on legislation and German tax authority practice at the date of this Base Prospectus. They summarise certain aspects of German taxation only which may be applicable to the Securities but do not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase, hold, transfer or redeem the Securities. In particular, this general summary does not consider any specific facts or circumstances that may apply to a particular purchaser. Potential purchasers of the Securities who are in any doubt about their tax position on purchase, ownership, transfer or exercise or non-exercise or redemption, as the case may be, of any Security should consult their own tax advisers.

The purchase or sale of a Security is not subject to stamp, value added or similar taxes or charges in Germany, regardless of the place of issuance, execution and delivery of the Security.

Payments in respect of interest (if any) made in respect of a Security to its holder if made by an Agent having its specified office in Germany or any other financial institution in Germany or if made by the Issuer from Germany may be subject to withholding tax.

4. Stamp Duty and Withholding Tax in the United Kingdom

The following paragraphs, which are intended as a general guide only, are based on legislation and United Kingdom HM Revenue & Customs practice at the date of this Base Prospectus. They summarise certain aspects of United Kingdom taxation only and customs which may be applicable to the Securities but do not purport to be a comprehensive description of all tax considerations which may be relevant to a decision to purchase the Securities. In particular, this general summary does not consider any specific facts or circumstances that may apply to a particular purchaser. Potential purchasers of the Securities who are in any doubt about their tax position on purchase, ownership, transfer or exercise or non-exercise or redemption, as the case may be, of any Security should consult their own tax advisers.

A purchaser or a Security may be required to pay stamp taxes and other charges in accordance with the laws and practices of the country of purchase in addition to the purchase price of such Security.

Potential purchasers of the Securities should note that the Global Security may constitute an instrument which is subject to United Kingdom stamp duty on issue by reference to the amount of the consideration paid or the value of the Security. However, the Global Security will be executed and delivered outside the United Kingdom and should not be brought into the United Kingdom save for the purposes of enforcement. So long as the Global Security is held outside the United Kingdom, it will not be necessary to pay United Kingdom stamp duty or interest or penalties in connection therewith. However, if the Global Security were brought into the United Kingdom (for example, for enforcement purposes), United Kingdom stamp duty may be required to be paid on the Global Security (subject to the availability of exemptions and reliefs). In addition, where the Global Security is executed outside the United Kingdom is subsequently brought into the United Kingdom and stamped, interest on the amount of the unpaid stamp duty will be payable in addition to the stamp duty in respect of the period from the expiry of 30 days from the date of execution of the Global Security to the date of stamping, unless the Global Security is stamped within 30 days of execution, in which case no interest is payable. No penalties are payable where the Global Security is executed outside the United Kingdom and subsequently brought into the United Kingdom and stamped, provided the Global Security is stamped within 30 days of being brought into the United Kingdom. If the Global Security is subject to United Kingdom stamp duty, it would be inadmissible in evidence in civil (as opposed to criminal) proceedings in an English court unless duly stamped. It should be noted however, that the United Kingdom HM Revenue & Customs have recently indicated that cash-settled warrants are not subject to stamp duty on issue. The Securities have some of the features of warrants (such as the requirement for there to be an exercise before any amounts become payable to holders). However, other features of the Securities are less warrant-like (such as the Issuer's right to redeem). It is possible that HM Revenue & Customs would be prepared to treat the Securities as warrants for stamp duty purposes, in which case they would not be stampable on issue.

The comments above relate to United Kingdom stamp duty on issue only.

Any interest payable on the Securities, any original issue discount in respect of the Securities and/or any proceeds on redemption or exercise of the Securities will not be subject to United Kingdom withholding tax.

5. Agents, Calculation Agent, Determinations and Modifications

5.1 Agents

The Issuer reserves the right at any time to vary or terminate the appointment of any Agent and to appoint additional Agents, provided that no termination of appointment of the Principal Agent shall become effective until a replacement Principal Agent shall have been appointed and provided that, if and to the extent that any of the Securities are listed on any stock exchange or publicly offered in any jurisdiction, there shall be an Agent having a specified office in each country if so required by the rules and regulations of each such stock exchange and the securities regulators in each such jurisdiction. Notice of any appointment, or termination of appointment, or any change in the specified office, of any Agent will be given to Securityholders in accordance with General Condition 4. Each Agent acts solely as agent of the Issuer and does not assume any obligation or duty to, or any relationship of agency or trust for or with, the Securityholders. Any calculations or determinations in respect of the Securities made by an Agent shall (save in the case of manifest error) be final, conclusive and binding on the Securityholders.

5.2 Calculation Agent

The Issuer shall undertake the duties of calculation agent (the "**Calculation Agent**" which expression shall include any successor calculation agent) in respect of the Securities unless the Issuer decides to appoint a successor Calculation Agent in accordance with the provisions below.

The Issuer reserves the right at any time to appoint another institution as the Calculation Agent, provided that no termination of appointment of the existing Calculation Agent shall become effective until a replacement Calculation Agent shall have been appointed. Notice of any such termination or appointment will be given to the Securityholders in accordance with General Condition 4.

The Calculation Agent (except where it is the Issuer) acts solely as agent of the Issuer and does not assume any obligation or duty to, or any relationship of agency or trust for or with, the Securityholders. Any calculations or determinations in respect of the Securities made by the Calculation Agent shall (save in the case of manifest error) be final, conclusive and binding on the Securityholders.

The Calculation Agent may, with the consent of the Issuer, delegate any of its obligations and functions to a third party as it deems appropriate.

5.3 Determinations by the Issuer

Any determination made by the Issuer pursuant to the Conditions shall (save in the case of manifest error) be final, conclusive and binding on the Securityholders.

5.4 Modifications

The Issuer may, to the extent permitted by applicable law, modify the Conditions without the consent of the Securityholders or any of them in any manner which the Issuer may deem reasonably necessary in order to maintain or preserve the intended commercial purpose of the Conditions if such modification does not materially adversely affect the interests of the Securityholders or is of a formal, minor or technical nature or intended to correct a manifest error or to cure, correct or supplement any defective provision contained therein. Notice of any such modification will be given to the Securityholders in accordance with General Condition 4 but failure to give, or non-receipt of, such notice will not affect the validity of any such modification.

6. Taxation

In relation to each Security the relevant Securityholder shall pay all Securityholder Expenses as provided in the Product Conditions. All payments or, as the case may be, deliveries in respect of the Securities will be subject in all cases to all applicable fiscal and other laws and regulations (including, where applicable, laws requiring the deduction or withholding for, or on account of, any tax, duty or other charge whatsoever). The Issuer shall not be liable for or otherwise obliged to pay, and the relevant Securityholder shall be liable for and/or pay, any tax, duty, charge, withholding or other payment whatsoever which may arise as a result of, or in connection with, the ownership, any transfer, any payment and/or any delivery in respect of the Securities held by such Securityholder. The Issuer shall have the right, but shall not be obliged, to withhold or deduct from any amount payable or, as the case may be, any delivery due to the Securityholder such amount or portion as shall be necessary to account for or to pay any such tax, duty, charge, withholding or other payment. Each Securityholder shall indemnify the Issuer against any loss, cost or other liability whatsoever sustained or incurred by the Issuer in respect of any such tax, duty, charge, withholding or other payment as referred to above in respect of the Securities of such holder.

7. Further Issues

The Issuer shall be at liberty from time to time without the consent of Securityholders or any of them to create and issue further securities so as to be consolidated and form a single series with the Securities.

8. Substitution

8.1 Substitution of Issuer

The Issuer, or any previous substituted company, may at any time, without the consent of the Securityholders substitute for itself as principal obligor under the Securities any company (the "**Substitute**"), being any subsidiary or affiliate of the Issuer, subject to:

- (a) the obligations of the Substitute under the Securities being guaranteed by Deutsche Bank AG (unless it is the Substitute);
- (b) all actions, conditions and things required to be taken, fulfilled and done (including the obtaining of any necessary consents) to ensure that the Securities represent legal, valid and binding obligations of the Substitute having been taken, fulfilled and done and being in full force and effect;
- (c) the Issuer shall have given at least 30 days' prior notice of the date of such substitution to the Securityholders in accordance with General Condition 4.

In the event of any substitution of the Issuer, any reference in the Conditions to the Issuer shall henceforth be construed as a reference to the Substitute.

8.2 Substitution of Office

9. Replacement of Securities

Should any Security be lost, stolen, mutilated, defaced or destroyed, it may be replaced at the specified office of the Principal Agent (or such other place of which notice shall have been given in accordance with General Condition 4) upon payment by the claimant of the expenses incurred in connection therewith and on such terms as to evidence and as to indemnity as the Issuer may reasonably require. Mutilated or defaced Securities must be surrendered before replacements will be issued

(b) where the Conditions contain a rate of exchange or any of the Conditions are expressed in a currency (the "**Original Currency**") of a country which is participating in the third stage of European Economic and Monetary Union, whether as from 1999 or after such date, such rate of exchange and/or any other terms of the Conditions shall be deemed to be expressed in or, in the case of a rate of exchange, converted for or, as the case may be into, euro at the Established Rate; and

(c) such other changes shall be made to the Conditions as the Issuer may decide to conform them to conventions then applicable to instruments expressed in euro.

10.2 Adjustment to Conditions

The Issuer may, without the consent of the Securityholders, on giving notice to the Securityholders in accordance with General Condition 4 make such adjustments to the Conditions as the Issuer may determine to be appropriate to account for the effect of the third stage of European Economic and Monetary Union pursuant to the Treaty on the Conditions.

10.3 Euro Conversion Costs, etc.

Notwithstanding Condition 10.1 and/or Condition 10.2, none of the Issuer, the Calculation Agent and any Agent shall be liable to any Securityholder or other person for any commissions, costs, losses or expenses in relation to or resulting from the transfer of euro or any currency conversion or rounding effected in connection therewith.

VII. COUNTRY SPECIFIC INFORMATION

This section should be read in conjunction with, and is subject to, the Product Conditions, the General Conditions and all other sections of this document.

1. Taxation in the Republic of Poland

a. General Information

The following is a discussion of certain Polish tax considerations relevant to an investor who is resident of Poland or otherwise subject to Polish taxation. This statement must not be understood to be tax advice. It is based on the Polish tax laws and its interpretation in effect as of the date of this prospectus that may be subject to changes. Such changes may be enacted also retroactively and may negatively effect the tax treatment as described below. This description does not purport to be complete with respect to the tax information that may be relevant for investors due to their personal circumstances. Prospective buyers of the Securities are advised to consult their professional tax advisor regarding the tax consequences of the purchase, ownership, disposal, redemption or transfer without consideration of the Securities.

b. Taxation of a Polish tax resident private investor (natural persons)

aa. *Income from capital investments*

Income – other than interest - derived by a Polish tax resident individual (i.e. a natural person having centre of life affairs in Poland) from financial instruments held as non-business assets qualify as capital income according to Article 17 of the Polish Personal Income Tax Act. Such an income is subject to 19% flat rate tax, which should be settled by the taxpayer himself by 30 April of the following year. No tax advance payments are due. The costs of acquisition of the securities will be recognised at the time the revenue is achieved

This income does not cumulate with the general income subject to the progressive tax rate.

bb. *Withholding Tax on Interest Income*

In case the Securities are kept in a securities account maintained with a Polish bank or a Polish brokerage house, such bank or brokerage house is generally required to withhold tax at a rate of 19% on any interest or discount (i.e. difference between the redemption price paid by the issuer and the initial purchase price of the Securities paid by the investor) paid to an investor.

This income does not cumulate with the general income subject to the progressive tax rate.

c. Taxation of a Polish tax resident holding the Securities as a business asset, individual or corporate

A Polish tax resident holding the securities as a business asset will be subject to income tax on the securities (both on capital gain and on interest/discount) following the same principles as those applying to any other income from business activity. In respect of the capital gains, the costs of acquisition of securities will be recognised at the time the revenue is achieved. In respect of natural persons holding the Securities as a business asset, the tax authorities may require that the tax on the income deriving from interests/discount is withheld following the same principles as apply to individual private investors.

The appropriate tax rate will be the same as the tax rate applicable for the business activity, i.e. 19% for a corporate or, in case of an individual, 19% or the progressive tax rate, depending on the choice of the taxpayer.

d. Securities held by a non-Polish tax resident individual or corporate

An individual not having his centre of life affairs in Poland or a corporation not maintaining a seat nor place of management in Poland will be subject to personal income tax (19%) or corporate income tax (20 %) on interest (including discounts) derived from Poland, unless the respective double tax treaty provides otherwise.

With respect to other types of income (including capital gains), in general it should be subject to the same principles as those applying to Polish residents, unless the respective double tax treaty provides otherwise.

If the foreign recipient of income acts through a permanent establishment in Poland, as a matter of principle it should be treated in the same manner as a Polish tax resident.
